Learn about Black Rhinos

Black Rhino Facts

- Black rhinos are large mammals that live in Africa.
- They use their horns for protection.
- They have a pointed upper lip that helps them grab leaves and branches.
- They can run up to 35 miles per hour.

Word List

- “rhino” comes from the word “rhinoceros”
- mammals - animals that are warm-blooded, have backbones and hair.
- endangered species - an animal or plant in danger of becoming extinct.
- extinct - no longer found on Earth
- horn - a growth on the animal’s head

Black Rhino Sounds

- Snorts and grunts

Did you know rhinos roll in the mud to prevent sunburn and insect bites!
